**Subject:** Re: Dimock - press

Yes, Talia, we will add you to our list. Here is what we released today:

EPA has completed and shared with residents and Pennsylvania state officials the fourth set of sampling for 12 private drinking water wells in Dimock, Pa. This set of sampling did not show levels of contaminants that would give EPA reason to take further action. At one well, EPA found an elevated level of methane and informed the resident, the Pennsylvania Department of Environmental Protection and the Susquehanna County Emergency Management Agency. Throughout EPA's work in Dimock, the Agency has used the best available scientific data to provide clarity to Dimock residents and address their concerns about the safety of their drinking water.

For more information on the sampling results, visit: <http://www.epa.gov/aboutepa/states/pa.html>

Hi Roy and Terri,

Can you add me to your press lists? I'd like to get the release about the Dimock well sampling that was sent out today.

My contact information is below.

Best,  
Talia
